MEMPHIS, TENN., SATURDAY, MARCH 12, 1870,

STEAMBOATS.

Brief Synopsis of a Bill to Provide for the Better Security of Life.

Captains and Mates as well as Pilots and Engineers to be Hereafter Examined and Licensed.

We published in the Appeal of yesterday an abstract of the report of Mr.

Devereaux, Chief of the Board of th will take the place of all existing en- are properly carried out. netments for the better security of

The first section makes no change in the operation of the present laws. Section two requires pipes to be attached to the boilers to convey steam into the hold of the vessel in case of

Amendments are proposed in sec-

tion three. Section four is a substitute for section seven of the act of 1852. That act prohibits but one dangerous article (loose hemp) from being carried on passenger steamers. It is pro-posed by this section to add the follow-ing to the prohibited articles, viz: Loose hay, loose cotton, camphene, nitro-glycerine, naptha, benzine, benpetroleum that will not stand a "fire test" of one hundred and ten degrees of the Fahrenheit thermometer, and other like explosive fluids, and other like dangerons articles. These artimust not be carried as freight nor used as stores on any steamer carrying pas-

Section five embraces section eight of the act of 1852, amended by adding to it other dangerous articles named, and not confining the shipment to be on board of any steam vessel carrying passengers," as in the act of 1852. Section six. Keeping watch at night is a new provision, and of its propriety and usefulness there can be no

Section seven provides for life-boats for river steamers, substantially the same as section four of the act of 1852, provides for the same class of steamers, with an amendment requiring other steamers than those carrying

in section eight it is proposed to require a sufficient number of lifeboard for the use of all persons, in

addition to the buckets now provided for, to contain water for the purpose of extinguishing fire, and the number of that it was useless. As soon as the buckets and axes in proportion to the tonnage of the vessel, is more definitews, and so as to be easily under-
